Education

Shri Ramswaroop Memorial College of Engineering and Management

Lucknow, U.P.

*Bachelor of Technology in Computer Science & Engineering | **Percentage: 88***

Aug 2022 – May 2026

Internships

TechieHelp – India's Leading AI Software Development Company [Certificate]

India (Remote)

Front-End Developer Intern

Sep 2025 – Oct 2025

- Delivered **10+ reusable React components** for **Eventra**, a wedding & event services platform targeting Bihar's events market, cutting UI development time by **30%** for the core team.
- Achieved **95+ Lighthouse performance score** by optimizing rendering, lazy-loading assets, and ensuring fully responsive layouts across **3 device breakpoints**.

Shell-Edunet Skills4Future – AICTE Virtual Internship [Certificate]

Remote

AI/ML Intern

Jun 2025 – Jul 2025

- Built a supervised ML model for **water quality prediction** across **5+ physicochemical parameters**, achieving **87%+ classification accuracy** using scikit-learn pipelines in Python.
- Applied feature engineering and cross-validation on a **3,000+ row dataset**, reducing model overfitting by **15%** and improving generalization on held-out test splits.

Projects

Full-Stack MERN Bookstore Application | MongoDB, Express.js, React.js, Node.js, JWT

GitHub

- Architected a full-stack bookstore with **2 independent portals** (user + admin), JWT auth, and role-based access control – serving **10+ concurrent API endpoints** with sub-200ms response times.
- Built admin dashboard managing **50+ SKUs** with real-time inventory tracking and order lifecycle management, reducing manual catalog update time by **70%**.

Full-Stack Job Portal Application | React.js, Supabase, Clerk Auth, Tailwind CSS, Shadcn UI

GitHub

- Built a dual-role job portal with **8+ advanced filters**, one-click applications, and role-based dashboards for job seekers and recruiters – reducing job discovery time by **50%**.
- Integrated **Supabase real-time DB** and **Clerk OAuth**, enabling zero-downtime auth and sub-second data sync across **4 relational tables** for postings and applications.

Medical Report Summarizer (LangChain + RAG) | LangChain, HuggingFace, FAISS, Streamlit

GitHub

- Designed a RAG pipeline (LangChain + FAISS + HuggingFace) improving factual accuracy by **40%** over baseline LLM outputs with **under 5-second** average inference time per report.
- Reduced physician report reading time by **60%**; deployed via ngrok with **100% uptime** across **20+ demo sessions** using real medical document inputs.

Cerebral Autonomy -Parkinson Detection | Python, Machine Learning, Flask, Scikit-learn

GitHub

- Developed an AI-driven voice analysis system for emotional monitoring and early Parkinson's disease prediction using machine learning and speech feature extraction techniques.
- Implemented preprocessing and predictive modeling pipelines for real-time voice-based analysis, improving accuracy and system responsiveness for healthcare applications.
- Built a Flask-based interactive interface and prepared IEEE-standard technical documentation for conference submission and research presentation.

Achievements & Leadership

National Hackathon Winner – Won Hackloop 2025 competing against **100+ teams** nationwide; shipped a working full-stack MVP within a **24-hour** sprint window. [Certificate]

Smart India Hackathon Finalist (2x) -- Shortlisted **2 consecutive years** to represent institute at India's largest national innovation challenge (500,000+ participants pan-India).

Top 3% Nationally – Ranked **14,481 / 500,000+** in the Naukri.com Young Turks 2025 Skill Assessment, outperforming **97%** of all participating professionals. [Certificate]

Best B.Tech Project Award and Best Dissertation At College Level Gold Medal and Silver Medal [Certificate]
Graduated with 8.8 CGPA in B.Tech

Completed Udemy Python course 2026 [Certificate]

Technical Skills

Languages: Java, JavaScript (ES6+), Python, SQL

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Shadcn UI

Backend & Databases: Node.js, Express.js, MongoDB, Supabase, MySQL

AI/ML: LangChain, HuggingFace Transformers, FAISS, RAG Pipelines, Supervised Learning, scikit-learn
